

# The only driving-plate library built around how art directors actually search.

# Four steps from brief to booked

1

## Find it fast

- Instant facet filters — shot type, time, weather, speed, location
- Search reaches inside the footage: tags + detected objects
- Every filtered view is a shareable link

2

## Trust the shot

- Stitched view + 9-camera grid, frame-locked together
- The full sky tier most libraries skip
- Detected objects listed with confidence

3

## Fit your stage

- LED volume / green screen / projection badges
- Real specs: 3840×1920, Log3G10, 9× Komodo 6K
- GPS route + IMU telemetry for matchmove

4

## Lock it in

- Transparent \$8k/min pricing — no quote wall
- One-click 72-hour reserve hold
- Custom delivery built to your volume

WHY IT HOLDS UP

# A real catalog, priced without friction

LICENSE, PRO STITCHED

# \$8,000 / min

Prorated to the second after a one-minute minimum.

**One-click** 72-hour reserve hold

**No** "request a quote" wall

**Custom** volumetric-stage delivery on request

## Your footage stays protected

Every preview is watermarked; original masters are never web-served. Screening access uses signed, expiring links.

## Defensible chain of custody

Each plate is fingerprinted (sha256) at ingest, with a full per-stage audit trail behind it.

## The catalog builds itself

Automatic SKUs, AI object labeling, descriptions, and technical specs generated on every drop — so the library scales.

**9 cameras**

+ FULL SKY TIER

**360×180**

EQUIRECT ENVIRONMENTS

**GPS + IMU**

ON EVERY TAKE

**Find → book**

IN MINUTES, NOT DAYS
